

Low Voltage Resin Cable Joints

JOINTMASTER has used its vast experience and know-how, built up over many years in cable jointing, to develop a comprehensive range of low voltage products that offer outstanding quality and value, and still meet today's exacting requirements of the electrical distribution industry.

JOINTMASTER has a comprehensive range of low voltage joints that have been designed to accommodate all cable sizes ranging from 1,5 - 300mm².

JOINTMASTER offers the most comprehensive range of resin systems, in either polyurethane or epoxy. The resins are supplied in convenient easy to use see through mixer-packs and are protected in aluminium foil pouches.

Some of the resins available are; opaque polyurethane, clear polyurethane, clear epoxy, flame retardant clear or opaque epoxy, flame retardant opaque polyurethane, flexible polyurethane and re-enterable polyurethane resins. Flame retardant resin joints are supplied with flame retardant polycarbonate joint moulds.

Setting the Standards in Cable Jointing
